Statutory Vehicle Inspections

As a recognized leader in the field of statutory vehicle inspections, Applus+ can design, develop and operate a vehicle inspection program specific to each client's requirements.

DESCRIPTION

Challenge

Applus+ has worldwide experience in vehicle inspection, enabling us to provide clients, primarily consisting of Government, policymakers and regulators, with an effective roadworthiness system for all types of motorized vehicles ranging from commercial and passenger vehicles to motorcycles.

Depending on the client requirements, Applus+ can provide the following:

- Customized Inspection Network Design and Management
- Customized modular hardware and software
- Quality Assurance and Control
- Inspector Training and Certification
- Robust anti-fraud management
- Station and Program Staffing
- Innovative Technological Solutions
- Equipment Testing and Rollout
- Motorist Services

Solution

Applus+ has extensive knowledge in the implementation and operation of statutory automotive inspection programs for both commercial and light good vehicles.

Applus+ can leverage its extensive experience as a provider of custom technology solutions in order to develop a comprehensive, multi-faceted technology solution that can specifically meet all of the client's needs, thus resulting in a versatile, integrated application specific to the client's requirements. Applus+ develops solutions based upon the knowledge, experience and technologies needed in order to fulfill the specific client requirements.

Our professional technology teams design, develop and implement solutions that integrate technical expertise, hardware, software, infrastructure, training and ongoing support programs management throughout the duration of the contract.

Applus+ has a proven track record when it comes to statutory or periodic vehicle Inspections, having successfully launched and modernized inspection programs in Ireland, Spain, Finland, Sweden, Denmark and South America.

Benefits

Applus+ has statutory vehicle inspection programs that can provide the client with not only a customized inspection program, but also access to real time data through a web-based reporting system developed exclusively by Applus+.

Applus+ has built its reputation by remaining totally impartial and independent of the motor industry, among other things, by not engaging in any automotive activities that could compromise its position. We can provide automotive industry specialists who are highly trained, experienced and motivated. Their knowledge and flexibility allow them to operate statutory vehicle inspection programs in a variety of locations and situations throughout the world.
