# Vehicle Emission Inspections

Applus+ programs help governments, policy makers and regulators more effectively address today's environmental and safety concerns in the face of today's financial constraints. Internationally, Applus+ provides emissions testing equipment and services for the automotive industry.

DESCRIPTION

Applus+ has pioneered the integration of engineering, technologies and IT to create industry-best solutions for developing, implementing and managing vehicle emissions inspection programs. Applus works with government at all levels—city, county, state, national and international and create customized solutions in order to achieve cleaner air and safer roads while providing a quality service at lower financial costs.

Applus+ manages comprehensive vehicle inspection and maintenance programs that collectively represent more than 2,800 testing facilities, more than seven million vehicle tests per year and more than 20,000 Applus trained and certified inspectors.

Our comprehensive service offerings to the vehicle inspection include:

- Network Design and ManagementCustomized modular hardware and software
- Quality Assurance and Control
- Inspector Training and Certification
- Training for Managers, Service Reps, and the Repair Community
- Public Information and Industry Outreach
- Station and Program Staffing
- Equipment Testing and Rollout
- Motorist Services
- Shop Management Software
