

Public Service Vehicle Inspections

Applus+ can provide its clients with the assurance that each public service vehicle inspected is in line with current industry standards and is in safe mechanical condition in order to be driven on public roads and to carry passengers.

Challenge

As one of the global leaders in automotive inspection and verification, Applus+ has extensive knowledge in the implementation and operation of statutory automotive inspection programs. Applus+ is therefore able to provide regulators, policymakers, Government departments and local authorities with tailor-made solutions for the licensing and testing of public service vehicles.

Solution

The many advantages of choosing Applus+ as the service provider for the inspection of Public Service Vehicles are as follows:

- We have the resources and capabilities to provide a one-stop shop for the testing and licensing of Public Service Vehicles
- Assurance that the vehicle is completely roadworthy
- Applus+ will take full control of the administration, staffing, IT equipment and technical equipment
- The client will have the ability to monitor our performance through reports, which will be readily available in real time through a web-based application, providing up to date access to test pass/fail stats, common reasons for failure etc.
- Consistent and accurate assessment of vehicles that is totally impartial and independent of the Public Service Vehicle industry.
- The service can be tailored to meet the client's requirements, i.e., bookings made through a centralized call centre, inspection process and database hosting.

Benefits

Applus+ has the experience and capability to work with any client in order to design an effective solution based on specific needs and requirements.
